

WIND MAPS

Map 1: Winds about the '98 Race low at 4.00 pm (EDST) Sunday 27 December 1998 from the numerical simulations by Graham Mills of the Bureau of Meteorology Research Centre (BMRC).

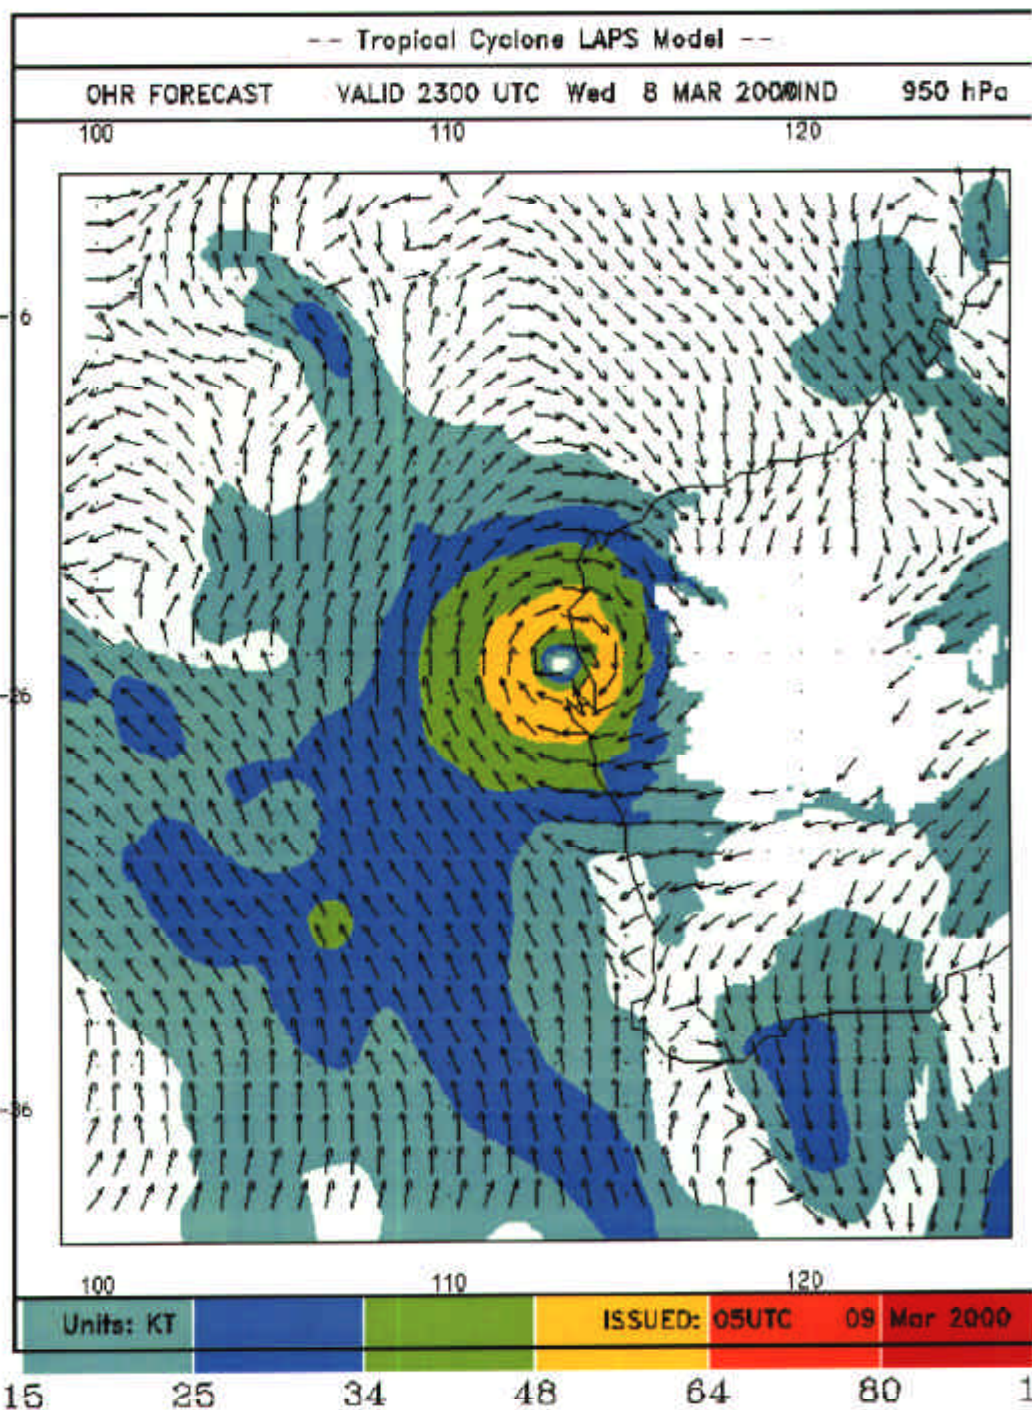

- Blue "feathers" indicate winds (10 minute mean, at 10 m height) in the range 53 knots to 62 knots.
- Purple feathers are winds in the range 43 to 52 knots.
- Red feathers are winds in the range 38 to 42 knots
- Yellow feathers are winds of 37 knots or less.

Map 2: Winds (10 minute mean at 10 m height) around tropical cyclone *Steve* as it approached the Western Australia coastline on Wednesday 8 March 2000. Wind speeds are given by colour legend.
